EDGE 8300 Cashless ATM

CASHLESS ATM

Design by EDGE⁺ Innovations (Singapore)

EDGE 8300 (Cashless ATM) is the latest cost-efficient banking device, which offers high quality performance to banks and their customers. This technology gives banks the competitive advantage by enabling end-users to perform multiple self-service functions that include account inquiries, online transactions, bill payments, IC card recharging and many others.

Specifications:

- Durable power coated steel enclosure
- Industrial GPRS/3G module
- Mobile PC
- High resolution camera
- Dual Amplified speaker
- 8.4" LCD monitor
- Touch screen + Function Keys
- Metal pin pad/PCI 3.0
- Barcode reader/1D, 2D, QR
- Dual Magnetic, IC & RFID Card reader
- Thermal receipt printer 80 mm
- Power supply
- GPS module
- Microphone

Functions:

- High performance and low fault rate operation system
- Low power consumption and fan-less design
- High security with ATM full hardware encryption
- Data chip storage (all data store on the chip to avoid data loss)
- User friendly computer interface
- Easy to set up and able to work in extremely tough indoor and out-door environments
- Low maintenance cost
- Dual Mag Stripe, Contact and contactless reader and writer
